**Structured AI use cut senior review rounds by 43%, and quality held.**

Recommended next step: one more Pro seat, assigned to a mid-level developer as a second case study.

| Senior review rounds per PR | 85% of 3-point issues finish within | Issues delivered per seat per sprint |
|---|---|---|
| **1.6** | **6 days** | **5.0** |
| Baseline 2.8 −43% | Baseline 9 days −33% | Baseline 4.1 +22% |

## Quality guardrails

| Revert rate | Reopened issues | Median PR size |
|---|---|---|
| **2%** baseline 2% | **4%** baseline 5% | **248 lines** baseline 210 |
| HOLDING | HOLDING | WATCH |

## Review rounds dropped once structured use started

Median senior review rounds per PR, by sprint

### What hasn't improved yet

Time to first review is unchanged at 2.4 days. Only a few senior engineers review, and AI doesn't change who reviews.

### Next step

One more Pro seat ($60 a month over the current plan) for a mid-level developer, measured against the criteria sent on [DATE].
